Why Are So Many New Cars Sold Around Thanksgiving?

(Segment and Angle Addition Practice)

Directions: Solve each problem to find the value of x and find its matching answer in the answer box. Decode the answer to the riddle using the letter of the answer associated with each question. Show all of your work.

Answer:
4 2 5 7 1 8 8 10 2 4 3 6 2 8
9 11 12 7 13 7 11 2 11 3 13 3 8 9 4 14 6

1. $AC = \dots$ 2. $NP = \dots$ 3. $\angle SPT = \dots$

4. $RS = \dots$ 5. $\angle XYW = \dots$ 6. $\angle IQR = \dots$

Why Was The Giraffe Glad To Have A Long Neck?

(Angle Addition Postulate Practice)

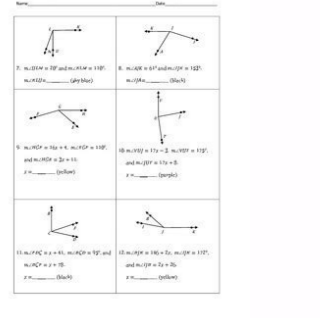

Directions: Solve each problem to find the value of x or the missing part of the figure, and find its matching answer in the answer box. Decode the answer to the riddle using the letter of the answer associated with each question. Show all of your work.

1. $m\angle ABC = \dots$ 2. If $m\angle ABD = 127^\circ$, then $m\angle ABC = \dots$ 3. If $m\angle XYZ = 78^\circ$, then $m\angle WYZ = \dots$

4. $m\angle QPS = \dots$ 5. If $m\angle DEF = 159^\circ$, then $m\angle CEF = \dots$ 6. If $m\angle LMO = 122^\circ$, then $m\angle LMP = \dots$

It can be used as a practical activity in the Geometry class, such as revision, or as an evaluation. It helps relieve the anxiety of the test, cut the trap, and offer your students a personalized, fun, level and relaxing experience with this unique structure. The "choice and create" format is designed for smooth and easy differentiation. Given the complementary or complementary angle, students need to find out the matching pair. Great for an interactive notebook. Easy to differentiate by removing some of the top-level questions. Students will use the corresponding angles, a set of 32 ... Each working sheet gives the students a few measures of Erulo, and the students must find the measures of the numbered ones. This resource includes both print and digital options. Presenting the four types of angles - interactive notes, a double-sided worksheet and an output slide. Printed to full color, this set of task cards can be used for a mathematical center for students to identify forms or classify in categories. I have used these as notices for your Mathematics magazine. Hunter-hunter fighters are a great activity for students because they get them to move since they are solving mathematical problems. Use the version of Google Forms that gives students instant feedback or print the coloring activity of funny mathematics without preparation. Questions that gradually increase the difficulty instant feedback - students aligned evaluation of 2 ccs pages (more than 1 revision pages) is a great way to see if your students have dominated 4.m.d.5: a relative and fractional parts of a círculo. The units include: acute, obtuse, right, straight, reflex and revolution. Léneás include: horizontal, vertical, perpendicular, parallel, diagonal and intersection.
